

Shell Unleaded formulated with 10% ethanol

Shell Unleaded formulated with 10% ethanol contains Shell's exclusive Fuel Economy Formula, which is designed to help improve fuel economy by reducing losses caused by engine deposits*.

Shell Unleaded formulated with 10% ethanol has a minimum 91 octane rating.

Looking for regular Shell Unleaded?

As part of our commitment to meeting the state government biofuels legislation, this site now stocks Shell Unleaded formulated with 10% ethanol.

If you normally fill up with regular Shell Unleaded, you can now choose from Shell Unleaded formulated with 10% ethanol (check your vehicle is 10% ethanol compatible), Shell Unleaded 95 or Shell V-Power, our 98 octane premium fuel.

Please check with your vehicle manufacturer or the enclosed table to see if your vehicle can use Shell Unleaded formulated with 10% ethanol.

To find your nearest regular Shell Unleaded site, please ask in store or check online at www.shell.com.au

Please note: Some motor vehicles must run on minimum 95 octane fuel (check your handbook or with your vehicle manufacturer).

Not all fuels are available at Coles Express sites. For more information please visit www.shell.com.au.

*Based on tests using fuel without additives and may vary by vehicle.

Why have you removed Shell Unleaded E10 from your price board?

We have removed regular Shell Unleaded and Shell Unleaded E10 from our price boards and replaced these with Shell Unleaded + ethanol. This reflects that this site now sells Shell Unleaded formulated with 10% ethanol as the main grade fuel. The discounted price will be displayed (if applicable) above the standard price in red.

Where possible, we have also introduced the price of Shell Diesel and/or Shell AutoGas (LPG).
