ABOUT ENERGIZED PROTECTION™

You need to know your oil will protect your engine under all conditions. No matter how hot, cold, steep, dusty, muddy or extended your operations, you demand protection.

The Energized Protection of Shell Rotella heavy-duty diesel engine oils provides protection in three critical areas:

- 1. Acid control** — helps protect against corrosion from acids formed as fuel burns and as the oil ages.
- 2. Deposit control** — helps keep engine clean for optimum performance and long life.
- 3. Wear control** — helps keep moving metal engine surfaces apart for long engine life.

PROTECTIVE POWER

Shell Rotella T1 is an easy-flow monograde for quality lubrication and consistent performance that delivers well proven performance additives to help prevent engine corrosion and wear.

Excellent wear protection that promotes engine durability, through:

- Low ash content, minimizing formation of deposits and helping to keep intake ports clean
- Outstanding oxidation resistance to maximize service life
- Excellent rust and corrosion protection for critical engine parts
- High-dispersancy detergent to help prevent engine sludge and varnish deposits
