

Shell Chemicals

Ethylene Oxide Product application clause

Shell Chemicals companies are committed to Responsible Care and primarily market Ethylene Oxide (EO) as a chemical intermediate. EO customers undertake that they do not use EO as a medical sterilant or in fumigant or pesticide applications, or as component of weapon systems nor will they repackage the EO. Shell Chemicals companies may in addition to any other remedies, postpone or withhold the supply of EO and/or terminate any EO supply Contracts on fifteen (15) days written notice if EO customers fail to comply with the undertaking in the foregoing sentence.
